

July 2011

Dear Scheme Member

### **Summary Funding Statement for the IBM IT Solutions Pension Scheme**

On behalf of the Trustee, I am writing to you to provide the annual statutory Summary Funding Statement for 2010.

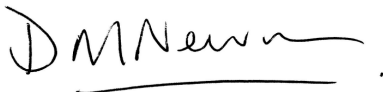

The last triennial Valuation, as at 31 December 2009, was completed in March 2011. This statement includes information from that Valuation Report as well as an update on the funding position at the end of 2010.

The 2010 Members' Report will be issued soon and will include information on the Valuation and other matters. If you are a deferred member and would like a copy of the Members' Report, you will be able to download a copy from the Pensions Trust website or you can call Pension Services and request a copy. Details of how to contact Pensions Trust are show below.

## SUMMARY FUNDING STATEMENT

### The formal ongoing funding valuation at 31 December 2009

The funding position at 31 December 2009 was:

	£million
Market value of Scheme assets (including AVCs and ASCs)	426
Amount required to cover the Scheme's past service liabilities	573
Deficit	147

The funding position of the Scheme has worsened from a deficit of £72 million at the end of 2008 to a deficit of £147 million at 31 December 2009 primarily due to the changes in the financial assumptions underlying the calculation of the liabilities. Positive factors that offset the worsening in the funding level were better than anticipated asset performance over the year and changes to the statutory revaluation requirements (which changed certain pension increases from Retail Price Inflation to Consumer Price Inflation).

The Trustee and the Principal Employer, IBM United Kingdom Holdings Limited, have agreed that the Company, IBM United Kingdom Limited, will pay additional contributions of £17 million each year from January 2011 until December 2020. If the assumptions set out in the Statement of Funding Principles are borne out in practice the shortfall of £147 million will be removed by 31 December 2020.

### Solvency position of the Scheme

The solvency position of the Scheme summarises the ability of the Scheme to cover its liabilities were the Scheme to be discontinued and wound up and members' accrued benefits secured with an insurance company. It is estimated that as at 31 December 2009, without any further contribution from the Company, the cover for accrued benefits would have been about 41% on this approach.

### Latest Funding update as at 31 December 2010

The estimated position at the end of 2010, which is based on approximate calculations of the funding position at that date, is estimated to be a deficit of around £160 million. The main reason for the worsening compared to the actuarial valuation at 2009 has been increases in the liabilities resulting from changes in market conditions

The Scheme Actuary is currently undertaking an interim valuation as at 31 December 2010, which could reveal a deficit that is higher or lower than this estimate. The results of the interim valuation will be provided to members in due course.

### Payments to IBM UK Limited

The regulations require confirmation, or otherwise, of any payments made to the sponsoring employer during the period since the last Summary Funding Statement. The Trustee confirms that there have been no such payments.

### Modifications imposed by the Regulator

The regulations also require the Trustee to report whether the Pensions Regulator has modified the Scheme in respect of future accrual of benefits, given directions in relation to the Scheme's Technical Provisions or imposed a schedule of contributions. The Trustee confirms that the Regulator has taken no such action in respect of the Scheme.
