

# IBM PENSIONS TRUST

## IBM I.T. Solutions Pension Scheme

Environmental, Social and Governance (ESG) – Highlights  
Year Ended 31 December 2023

### Why take action?

The potential improvement in funding level over the next 10 years could be reduced by 2% if 'no action' was taken.

▼ 2%

What is meant by 'no action'? This assumes little climate action is taken in the short term, followed by sudden unanticipated tightening as countries rush to get on track to limit temperature rise to below 2°C.

### Trustee Target

The Trustee is aiming to reduce portfolio carbon intensity by 20% over the 3 years from 31 December 2022. Carbon intensity measures the portfolio's exposure to carbon-intensive companies based on their weightings in the portfolio. Further details on the target are set out in the Scheme's Climate Change-related Disclosures report.

### Progress against Target

Progress against the Trustee's carbon intensity target since 31 December 2022 is set out below:

Mandate(s)	% of portfolio	Change in carbon intensity
Global Bonds / Global Credit / Long-term UK Core Credit	26.7%	-22%
Diversified Multi-Asset Growth (DMAG)	4.8%	-2%
Alternative Credit	2.7%	20%

The reduction in carbon intensity for the Scheme's credit and DMAG portfolios is recognised as positive progress, noting data quality and coverage is expected to continue to improve in future.

The Trustee is engaging with the investment managers on the carbon exposures for the mandates where there has been an increase in carbon intensity over the reporting year.

### Key Actions in 2023

**Increased reporting** on the Implied Temperature Rise of the Scheme's mandates.

**Improvements in climate commitments** of investee companies approved by Science Based Targets initiative (SBTi).

**Development of an energy efficiency and diversity, equity and inclusion (DEI) framework** to monitor and better understand investment managers' approach in these areas and align with the Trustee's key priorities. This follows greater focus on these areas in the 2023 Stewardship Assessment.

**IBM Pensions Trust continued to engage with the Scheme's investment managers** on an ongoing basis.

### Actions for 2024

**Stewardship:** Engaging with investment managers on carbon intensive holdings, voting and engagement activity.

**Risks:** Annual review of ESG beliefs, risk register and Scheme governing documentation.

**Climate Analysis:** Climate change risks and opportunities considered as part of strategic reviews.

**Training:** Ensuring the Trustee is well equipped with sufficient knowledge of developments around climate change risk and regulatory changes.

**Data:** The Trustee expects the availability and quality of data to increase over time and is working with its investment managers on improved reporting over time. The Trustee will also look to consider further attribution analysis to understand the drivers to the change in their reported metrics.

### Greenhouse Gas Emissions

The Scheme is invested in companies that generate greenhouse gas emissions of approximately:

**16,000 tons CO<sub>2</sub>e**

The Trustee aims to reduce this figure.

Total emissions quoted is scope 1 & 2 emissions and covers approximately 35% of total Scheme assets shown in the 'progress against target' section (where carbon emissions data is available) from the investment managers as at 31 December 2023.

### Emissions in the real world

Since 31 December 2022, there has been a reduction in total carbon emissions for the Scheme's corporate assets of approximately 3,000 tons CO<sub>2</sub>e, under scope 1 & 2 emissions.

This is broadly equivalent to removing from the road:

**1,200** 

Based on average car mileage of 9,000 per year and 280g CO<sub>2</sub> per mile for a medium sized car.

### Trustee Beliefs

ESG factors, including climate change, can impact the performance of the Scheme's investments over the medium to long-term.

**Taking a broader and longer-term perspective on risk**, including identifying sustainability themes and trends, presents risks and opportunities which require explicit consideration.

**Stewardship** can add value to the Scheme's assets in the long term and the Trustee will therefore seek to appoint managers who demonstrate strong engagement credentials.

The Trustee reflects the above beliefs within its investment strategy considerations.
